

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/13/2010

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

Safety Assessment and Safety Conclusion

A. Safety Threats: Are negative family conditions and/or circumstances, and/or caregiver behaviors, emotions, attitudes, and perceptions that are out of control in the presence of a vulnerable child and therefore likely to have severe effects on a child at any time in the near future.

- **Out-of-Control:** refers to family behavior, condition, or situations which are unrestrained, resulting in an unpredictable and possibly chaotic family environment not subject to the family's influence, manipulation, or ability to control. Such out-of-control family conditions pose a danger.
- **Severity:** refers to the effects of maltreatment that have already occurred and/or potential for harsh effects.
- **Imminent:** refers to the belief that dangerous family behaviors, conditions, or situations will remain active or become active within the next several days to within a month. This is consistent with a degree of certainty that, barring intervention, danger and severe harm are possible or even inevitable outcomes.
- **Observable:** refers to family behaviors, conditions, or situations representing a danger to a child that are specific, definite, real, can be seen and understood, and are subject to being reported and proven.
- **Vulnerable Child:** refers to a child who is dependent on others for protection and exposed to circumstances that she or he is powerless to manage and is susceptible, accessible, or available to a threatening person and/or persons in authority over them. Vulnerability is judged according to age, physical and emotional development, ability to communicate needs, degree of mobility, size, and level of dependence and susceptibility. This definition also applies to all young children ages 0 to 6 and older children who, for whatever reason, are not able to protect themselves or seek help from protective others.

Safety Threats

1. No adult in the home is performing basic parenting duties and responsibilities that assure child safety.
YES NO
2. One or both parents/caregivers are violent and/or acting dangerously.
YES NO

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/13/2010

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

3. One or both parents/caregivers will not/cannot control their behavior.
YES NO
4. One or both parents/caregivers perceive a child in extremely negative terms.
YES NO
5. The family does not have or use resources necessary to assure child's safety.
YES NO
6. One or both parents/caregivers are threatening to severely harm a child or are fearful they will maltreat a child and/or request placement.
YES NO
7. One or both parents/caregivers intend(ed) to seriously hurt a child.
YES NO
8. One or both parents/caregivers lack parenting knowledge, skills or motivation necessary to assure a child's safety.
YES NO
9. A child has exceptional needs that affect his/her safety which parents/caregivers are not meeting, cannot meet or will not meet the child's needs.
YES NO
10. Living arrangements seriously endanger a child's physical health.
YES NO

B. Safety Assessment: Answer the following based on the safety threats identified and proceed as instructed.

1. One or more safety threats are identified. YES NO
2. If Yes to the above, proceed to C below.
3. If No to the above, proceed to E below.

C. Child Vulnerability

YES NO

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/13/2010

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

Explain how each child is vulnerable to the identified safety threats:

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

- Can and Will Protect (Provide justification below)
- Cannot/Will Not Protect (Proceed to E)
- N/A – no other caregiver in home or no non-maltreating caregiver

State the basis for your professional judgment if your conclusion is that a non-maltreating parent/caregiver can and will protect the child. Describe protective capacities and how the parent/caregiver has protected the child in the past.

E. Case Opening or Closing:

- The case will remain open.
 - There is an unsafe child (safety threat, vulnerable child, and non-protective parents). If the case will remain open, complete F and G.
 - The risk level is High.
- The case can be closed. There is no unsafe child and the risk level is low or moderate. Indicate reasons and move to signature section:

There were no safety threats identified. No support for finding of abuse/neglect. Risk level moderate.

F. Impending Danger Description: Describe how impending danger is currently manifested in the family. Include how each threat is occurring, when and how often, and under what circumstances. Include whether others are involved, whether all five safety threshold criteria apply, and the inability of the family to control the threat to child safety.

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/13/2010

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

G. Analysis for In-Home Safety Plan: Complete to determine if an In-Home Safety Plan is appropriate.

1. Are the parent/caregivers residing in the home?
YES NO
2. Is the home calm/consistent enough to allow for safety services to come into the home?
YES NO
3. Are parent/caregivers willing to allow and/or participate with an in-home safety plan?
YES NO
4. Are services/resources available to participate with an in-home safety plan?
YES NO

If **NO** to any of the above, an in-home safety plan is not appropriate.

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 11/9/10

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

Explain how each child is vulnerable to the identified safety threats:

Mother is the child's primary caregiver. She is not able to control her behavior and provide some basic care and household management because she has stopped taking her medication. In addition, mother has become verbally aggressive toward the child. Child is still at an age where she is dependent upon her mother for providing care and supervision, thus making her vulnerable to the threats.

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

- Can and Will Protect (Provide justification below)
- Cannot/Will Not Protect (Proceed to E)
- N/A – no other caregiver in home or no non-maltreating caregiver (Proceed to E)

State the basis for your professional judgment if your conclusion is that a non-maltreating parent/caregiver can and will protect the child. Describe protective capacities and how the parent/caregiver has protected the child in the past.

Adult older brother remains in the household and has demonstrated his ability and willingness to mediate the safety threat and provide care for his younger sister. He is providing supervision of the child, providing transportation, and assisting in assuring that there is food and clean clothing. He is able to contact resources for additional support if required. There is a neighbor who also provides support to the child and her adult older brother.

E. Case Opening or Closing:

- The case will remain open.
- There is an unsafe child (safety threat, vulnerable child, and non-protective parents). If the case will remain open, complete F and G.
- The risk level is High.
- The case can be closed. There is no unsafe child and the risk level is low or moderate. Indicate reasons and move to signature section:

F. Impending Danger Description: Describe how impending danger is currently manifested in the family. Include how each threat is occurring, when and how often, and under

Mock State Safety Assessment

Parent: N/A **Date of Birth:** N/A

what circumstances. Include whether others are involved, whether all five safety threshold criteria apply and the inability of the family to control the threat to child safety.

Mother not able to control her own behavior and tend to basic care of the child and household management. Mother has become verbally aggressive toward child. Impending danger manifests as mother continues not to take medication. Mother's behavior becomes more out of control and her condition is projected to become more severe the longer she refrains from taking her medication. Deterioration is observable in terms of mother's behaviors and condition of the household.

G. Analysis for In-Home Safety Plan: Complete to determine if an In-Home Safety Plan is appropriate.

1. Are the parent/caregivers residing in the home?

YES NO

2. Is the home calm/consistent enough to allow for safety services to come into the home?

YES NO

3. Are parent/caregivers willing to allow and/or participate with an in-home safety plan?

1. One or more safety threats are identified. YES NO
2. If Yes to the above, proceed to C below.
3. If No to the above, proceed to E below.

C. Child Vulnerability

YES NO

Explain how each child is vulnerable to the identified safety threats:

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 4-4-11

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

The child is at an age where she is dependent upon her adult caregiver to provide for her safety and basic needs. The caregiver her mother left her with is physically unable to provide care for the child. Mother and Father's locations are unknown. Child is left her without basic care and supervision, and there is no other resource (adult) available to the child. The mother is apparently not able to control her behavior due to some combination of her mental health condition and substance use/abuse. The home environment is unsafe; there is no food, water, or utilities. The father's potential to provide care is unknown. Father appears to have history of serial incarcerations and has not been involved in child's life.

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

The child is at an age where she is dependent upon her adult care giver to provide for her safety and basic needs, and the child's caregiver is recovering from a stroke and not physically able, and mother is not able to do that because of inpatient treatment for mental health issues and substance abuse. Mother appears to also lack knowledge/skills or possibly motivation to function in caretaking role with child as turns to child for care taking. Father's whereabouts are unknown.

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

- Can and Will Protect (Provide justification below)
- Cannot/Will Not Protect (Proceed to E)
- N/A – no other caregiver in home or no non-maltreating caregiver (Proceed to E)

State the basis for your professional judgment if your conclusion is that a non-maltreating parent/caregiver can and will protect the child. Describe protective capacities and how the parent/caregiver has protected the child in the past.

E. Case Opening or Closing:

- The case will remain open.
 - There is an unsafe child (safety threat, vulnerable child, and non-protective parents). If the case will remain open, complete F and G.
 - The risk level is High or Very High.
- The case can be closed. There is no unsafe child and the risk level is low or moderate. Indicate reasons and move to signature section:

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 5/23/11

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

F. Impending Danger Description: Describe how impending danger is currently manifested in the family. Include how each threat is occurring, when and how often, and under what circumstances. Include whether others are involved, whether all five safety threshold criteria apply and the inability of the family to control the threat to child safety.

There is no adult household member in the home to provide for the basic needs of the child. Mother's mental health has deteriorated and judgment and perceptions have been further negatively impacted by substance abuse. No evidence of behavioral or cognitive protective capacity. Mother requires in-patient treatment and not in a position to exercise protective capacities. Impact of parental neglect is severe and occurring presently. Caregiver is not physically able to protect because of health issues. Father's whereabouts are unknown.

G. Analysis for In-Home Safety Plan: Complete to determine if an In-Home Safety Plan is appropriate.

1. Are the parent/caregivers residing in the home?

YES

NO

2. Is the home calm/consistent enough to allow for safety services to come into the home?

YES

NO

3. Are parent/caregivers willing to allow and/or participate with an in-home safety plan?

YES

NO

4. Are services/resources available to participate with an in-home safety plan?

YES

NO

If **NO** to any of the above, an in-home safety plan is not appropriate.

Parent: N/A **Date of Birth:** N/A

Safety Assessment and Safety Conclusion

A. Safety Threats: Are negative family conditions and/or circumstances, and/or caregiver behaviors, emotions, attitudes, perceptions that are out of control in the presence of a vulnerable child and therefore likely to have severe effects on a child at any time in the near future.

- Out-of-Control: refers to family behavior, condition, or situations which are unrestrained, resulting in an unpredictable and possibly chaotic family environment not subject to the family's influence, manipulation, or ability to control. Such out-of-control family conditions pose a danger.
- Severity: refers to the effects of maltreatment that have already occurred and/or potential for harsh effects.
- Imminent: refers to the belief that dangerous family behaviors, conditions, or situations will remain active or become active within the next several days to within a month. This is consistent with a degree of certainty that, barring intervention, danger and severe harm are possible or even inevitable outcomes.
- Observable: refers to family behaviors, conditions, or situations representing a danger to a child that are specific, definite, real, can be seen and understood, and are subject to being reported and proven.
- Vulnerable Child: refers to a child who is dependent on others for protection and exposed to circumstances that she or he is powerless to manage and is susceptible, accessible, or available to a threatening person and/or persons in authority over them. Vulnerability is judged according to age, physical and emotional development, ability to communicate needs, degree of mobility, size, and level of dependence and susceptibility. This definition also applies to all young children ages 0 to 6 and older children who, for whatever reason, are not able to protect themselves or seek help from protective others.

Safety Threats

1. No adult in the home is performing basic parenting duties and responsibilities that assure child safety.
YES NO
2. One or both parents/caregivers are violent and/or acting dangerously.
YES NO

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 11/22/11

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

3. One or both parents/caregivers will not/cannot control their behavior.
YES NO
4. One or both parents/caregivers perceive a child in extremely negative terms.
YES NO
5. The family does not have or use resources necessary to assure child's safety.
YES NO
6. One or both parents/caregivers are threatening to severely harm a child or are fearful they will maltreat a child and/or request placement.
YES NO
7. One or both parents/caregivers intend(ed) to seriously hurt a child.
YES NO
8. One or both parents/caregivers lack parenting knowledge, skills or motivation necessary to assure a child's safety.
YES NO
9. A child has exceptional needs that affect his/her safety which parents/caregivers are not meeting, cannot meet or will not meet the child's needs.
YES NO
10. Living arrangements seriously endanger a child's physical health.
YES NO

B. Safety Assessment: Answer the following based on the safety threats identified and proceed as instructed.

1. One or more safety threats are identified. YES NO
2. If Yes to the above, proceed to C below.
3. If No to the above, proceed to E below.

C. Child Vulnerability

YES NO

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 11/22/11

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

Explain how each child is vulnerable to the identified safety threats:

The child is at an age where she is dependent upon her adult care giver to provide for her safety and basic needs. Mother appears to also lack knowledge/skills to function in caretaking role. Father is not in a position to demonstrate parenting skills as he is incarcerated.

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

- Can and Will Protect (Provide justification below)
- Cannot/Will Not Protect (Proceed to E)
- N/A – no other caregiver in home or no non-maltreating caregiver (Proceed to E)

State the basis for your professional judgment if your conclusion is that a non-maltreating parent/caregiver can and will protect the child. Describe protective capacities and how the parent/caregiver has protected the child in the past.

E. Case Opening or Closing:

- The case will remain open.
 - There is an unsafe child (safety threat, vulnerable child, and non-protective parents). If the case will remain open, complete F and G.
 - The risk level is High or Very High.
- The case can be closed. There is no unsafe child and the risk level is low or moderate. Indicate reasons and move to signature section:

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 11/22/11

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

F. Impending Danger Description: Describe how impending danger is currently manifested in the family. Include how each threat is occurring, when and how often, and under what circumstances. Include whether others are involved, whether all five safety threshold criteria apply and the inability of the family to control the threat to child safety.

Although the mother is now demonstrating the desire to function in the parental role, she is still working on developing the skills. There is some evidence of the development of behavioral and cognitive protective capacities; however, currently mother lacks the resources, and there is no safe home available as mother resides in a group home for recovering women. Father is incarcerated and, therefore, does not have a safe home environment.

G. Analysis for In-Home Safety Plan: Complete to determine if an In-Home Safety Plan is appropriate.

1. Are the parent/caregivers residing in the home?

YES NO

2. Is the home calm/consistent enough to allow for safety services to come into the home?

YES NO

3. Are parent/caregivers willing to allow and/or participate with an in-home safety plan?

YES NO

4. Are services/resources available to participate with an in-home safety plan?

YES NO

If **NO** to any of the above, an in-home safety plan is not appropriate.

Safety Assessment and Safety Conclusion

A. Safety Threats: Are negative family conditions and/or circumstances, and/or caregiver behaviors, emotions, attitudes, perceptions that are out of control in the presence of a vulnerable child and therefore likely to have severe effects on a child at any time in the near future.

- **Out-of-Control:** refers to family behavior, condition, or situations which are unrestrained, resulting in an unpredictable and possibly chaotic family environment not subject to the family's influence, manipulation, or ability to control. Such out-of-control family conditions pose a danger.
- **Severity:** refers to the effects of maltreatment that have already occurred and/or potential for harsh effects.
- **Imminent:** refers to the belief that dangerous family behaviors, conditions, or situations will remain active or become active within the next several days to within a month. This is consistent with a degree of certainty that, barring intervention, danger and severe harm are possible or even inevitable outcomes.
- **Observable:** refers to family behaviors, conditions, or situations representing a danger to a child that are specific, definite, real, can be seen and understood, and are subject to being reported and proven.
- **Vulnerable Child:** refers to a child who is dependent on others for protection and exposed to circumstances that she or he is powerless to manage and is susceptible, accessible, or available to a threatening person and/or persons in authority over them. Vulnerability is judged according to age, physical and emotional development, ability to communicate needs, degree of mobility, size, and level of dependence and susceptibility. This definition also applies to all young children ages 0 to 6 and older children who, for whatever reason, are not able to protect themselves or seek help from protective others.

Safety Threats

1. No adult in the home is performing basic parenting duties and responsibilities that assure child safety.
YES NO
2. One or both parents/caregivers are violent and/or acting dangerously.
YES NO
3. One or both parents/caregivers will not/cannot control their behavior.

Safety Assessment and Safety Conclusion

A. Safety Threats: Are negative family conditions and/or circumstances, and/or caregiver behaviors, emotions, attitudes, perceptions that are out of control in the presence of a vulnerable child and therefore likely to have severe effects on a child at any time in the near future.

- **Out-of-Control:** refers to family behavior, condition, or situations which are unrestrained, resulting in an unpredictable and possibly chaotic family environment not subject to the family's influence, manipulation, or ability to control. Such out-of-control family conditions pose a danger.
- **Severity:** refers to the effects of maltreatment that have already occurred and/or potential for harsh effects.
- **Imminent:** refers to the belief that dangerous family behaviors, conditions, or situations will remain active or become active within the next several days to within a month. This is consistent with a degree of certainty that, barring intervention, danger and severe harm are possible or even inevitable outcomes.
- **Observable:** refers to family behaviors, conditions, or situations representing a danger to a child that are specific, definite, real, can be seen and understood, and are subject to being reported and proven.
- **Vulnerable Child:** refers to a child who is dependent on others for protection and exposed to circumstances that she or he is powerless to manage and is susceptible, accessible, or available to a threatening person and/or persons in authority over them. Vulnerability is judged according to age, physical and emotional development, ability to communicate needs, degree of mobility, size, and level of dependence and susceptibility. This definition also applies to all young children ages 0 to 6 and older children who, for whatever reason, are not able to protect themselves or seek help from protective others.

Safety Threats

1. No adult in the home is performing basic parenting duties and responsibilities that assure child safety.
YES NO
2. One or both parents/caregivers are violent and/or acting dangerously.
YES NO
3. One or both parents/caregivers will not/cannot control their behavior.

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/25/12

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

- YES NO
4. One or both parents/caregivers perceive a child in extremely negative terms.
YES NO
5. The family does not have or use resources necessary to assure child's safety.
YES NO
6. One or both parents/caregivers are threatening to severely harm a child or are fearful they will maltreat a child and/or request placement.
YES NO
7. One or both parents/caregivers intend(ed) to seriously hurt a child.
YES NO
8. One or both parents/caregivers lack parenting knowledge, skills or motivation necessary to assure a child's safety.
YES NO
9. A child has exceptional needs that affect his/her safety which parents/caregivers are not meeting, cannot meet or will not meet the child's needs.
YES NO
10. Living arrangements seriously endanger a child's physical health.
YES NO

B. Safety Assessment: Answer the following based on the safety threats identified and proceed as instructed.

1. One or more safety threats are identified. YES NO
2. If Yes to the above, proceed to C below.
3. If No to the above, proceed to E below.

C. Child Vulnerability

YES NO

Explain how each child is vulnerable to the identified safety threats:

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/25/12

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

D. Protective Capacity Evaluation of Non-Maltreating Caregiver: Indicate below whether or not the non-maltreating parent or other adults residing in the home can/will protect the child.

- Can and Will Protect (Provide justification below)
- Cannot/Will Not Protect (Proceed to E)
- N/A – no other caregiver in home or no non-maltreating caregiver (Proceed to E)

State the basis for your professional judgment if your conclusion is that a non-maltreating parent/caregiver can and will protect the child. Describe protective capacities and how the parent/caregiver has protected the child in the past.

E. Case Opening or Closing:

- The case will remain open.
 - There is an unsafe child (safety threat, vulnerable child, and non-protective parents). If the case will remain open, complete F and G.
 - The risk level is High or Very High.
- The case can be closed. There is no unsafe child and the risk level is low or moderate. If risk remains high, indicate reasons for case closure and move to signature section:

Although risk remains high, parent is demonstrating sufficient protective capacities to address any safety issues and will continue with services and resources required to address risk.

Mock State Safety Assessment

Case Name: Jordan

Child(ren): Shawntese **Date of Birth:** 7/20/2000

Date of Assessment: 9/25/12

Parent: Freda Jordan **Date of Birth:** 7/25/1974

Parent: N/A **Date of Birth:** N/A

F. Impending Danger Description: Describe how impending danger is currently manifested in the family. Include how each threat is occurring, when and how often, and under what circumstances. Include whether others are involved, whether all five safety threshold criteria apply and the inability of the family to control the threat to child safety.

G. Analysis for In-Home Safety Plan: Complete to determine if an In-Home Safety Plan is appropriate.

1. Are the parent/caregivers residing in the home? YES NO

2. Is the home calm/consistent enough to allow for safety services to come into the home? YES NO

3. Are parent/caregivers willing to allow and/or participate with an in-home safety plan? YES NO

4. Are services/resources available to participate with an in-home safety plan? YES NO

If **NO** to any of the above, an in-home safety plan is not appropriate.
